Integrated solutions across three strategic sectors

Golden Gate International operates as an integrated, multi-disciplinary enterprise delivering end-to-end solutions across three strategic sectors in the Kingdom of Saudi Arabia.

By combining specialized local industry leaders with international design experts, we bring technical precision, aesthetic innovation and seamless execution to construction and mega-project management, advertising and media, and engineering, BIM and interior-exterior design.

> *Technical precision, aesthetic innovation and seamless execution.*

03

STRATEGIC SECTORS

Construction & mega projects, advertising & media, engineering & BIM design

03

SPECIALIZED PARTNERS

An established market specialist leads every discipline

02

COUNTRIES OF EXPERTISE

Local execution in Saudi Arabia, design expertise from France

01

POINT OF ACCOUNTABILITY

Streamlined management from design through delivery

Our integrated model

Each sector is led by an established market specialist. Golden Gate International brings them together, combining local industry leaders with international design expertise and managing every discipline as one accountable team.

01

Construction & Mega Projects Management

CONSTRUCTION PARTNER

Saudi Arabia

02

INTERNATIONAL DESIGN PARTNER

France

GOLDEN GATE INTERNATIONAL · SINGLE-SOURCE ACCOUNTABILITY

Strategic Sectors, Specialized Partners & Capabilities

Each sector is led by an established market specialist, eliminating execution risks and ensuring top-tier deliverables.

01

Construction & Mega Projects Management

General contracting, infrastructure development, mega-project execution & site management.

02

Advertising & Media

Strategic marketing, event operations, commercial signage fabrication & large-format printing.

03

Engineering & BIM & Interior-Exterior Design

Architectural design, engineering, BIM modeling & interior-exterior design, led by our design partner in France.

01

Construction & Mega Projects Management

Construction & Mega Projects Management

SPECIALIZATION

General Contracting, Infrastructure Development, Mega-Project Execution & Site Management.

PARTNER ENTITY

Specialized project contracting

Leadership in executing complex civil, structural, and commercial developments across Saudi Arabia, strictly adhering to international engineering and local regulatory standards.

17+

YEARS IN KSA

SCOPE OF WORK

01	Comprehensive direction and management of mega-scale construction projects.
02	Site coordination, civil & MEP supervision, subcontractor oversight, and quality control.
03	Schedule, budget, and compliance management from breaking ground through final handover.

Commercial & Residential Buildings

PORTFOLIO

A diverse portfolio of commercial, residential and mixed-use developments, including:

DEVELOPMENT TYPES

01	Office buildings and corporate headquarters
02	Mixed-use developments
03	Residential compounds and apartment buildings
04	High-rise and low-rise residential buildings
05	Retail centers and shopping complexes
06	Hospitality and serviced apartment developments
07	Hospitals and healthcare facilities
08	Community facilities and supporting infrastructure

Infrastructure

OVERVIEW

Our infrastructure works cover the full cycle, from design to handover:

SCOPE OF WORK

01	Engineering and design of infrastructure
02	Storage facilities and related civil works
03	Roadworks, paving and utility corridors
04	Earthworks, excavation, backfilling and site development
05	Structural works and foundations for infrastructure facilities
06	Testing, pre-commissioning and commissioning of infrastructure systems
07	As-built documentation and operation & maintenance handover

MEP Services

OVERVIEW

Mechanical, electrical and plumbing works, from design through handover:

SCOPE OF WORK

01	Mechanical, electrical and plumbing design and coordination
02	HVAC systems (chilled water, DX, ventilation and exhaust)
03	Electrical power distribution and lighting systems
04	Low-current systems (fire alarm, data, CCTV, access control, BMS)
05	Plumbing and drainage systems
06	Fire-fighting and fire-protection systems
07	Equipment selection, sizing and technical submittals
08	Shop drawings and coordination
09	Installation, testing and commissioning of MEP systems
10	Interface coordination with architectural and structural works
11	As-built documentation and operation & maintenance manuals

Fit-Out & Interior

OVERVIEW

Complete fit-out and interior works, from design to handover:

SCOPE OF WORK

01	Interior design and detailed shop drawings
02	Partitions, ceilings, flooring and wall finishes
03	Joinery, doors, glazing and architectural elements
04	Integrated MEP works within the fit-out scope
05	Final finishing, testing and handover

Mid-Rise Buildings

CONTRACT VALUE

SAR 183 Million, awarded with target completion in August 2028

CLIENT

Saudi Aramco

CONTRACT TYPE

Engineering, procurement, construction and commissioning

OVERVIEW

Two modern 10-story buildings that combine retail and offices within a landscaped site. Each ground floor hosts a shopping area, and the upper nine floors offer flexible offices of 125, 255 and 500 sqm.

KEY HIGHLIGHTS

01	Built-up area over 24,000 m^2
02	Full architectural, structural and MEP design development
03	Complete project management and construction execution
04	End-to-end procurement and supply chain management
05	MEP installation: HVAC, plumbing, fire protection, power, BMS and low-current
06	High-quality architectural and interior fit-out works
07	Turnkey delivery, including testing, commissioning and final handover

Residential & Commercial Buildings

CONTRACT VALUE
Over SAR 230 Million

CLIENT
Private sector

CONTRACT TYPE
Design, engineering, procurement and construction

OVERVIEW

Over the past 10 years, the company has delivered full design, engineering, procurement and construction for more than 40 residential buildings, from concept design through final handover, in line with applicable codes and quality standards.

KEY HIGHLIGHTS

01	Portfolio of 40+ residential buildings delivered over 10 years
02	Total built-up area exceeding 480,000 m^2
03	Full architectural, structural and MEP design development
04	Complete project management and construction execution
05	End-to-end procurement and supply chain management
06	MEP installation: HVAC, plumbing, fire protection, power and low-current
07	High-quality architectural and interior fit-out works
08	Turnkey delivery, including testing, commissioning and final handover

Luxury Residential

CONTRACT VALUE
SAR 98 Million, 2022

CLIENT
Sheikh Saleh Al Ghamdi

CONTRACT TYPE
Design, engineering, procurement and construction

OVERVIEW

Turnkey design, engineering, procurement and construction of a luxury residential development of 34 villas and a private palace within a gated compound, including architectural design, structural works, MEP systems and high-end interior finishing.

KEY HIGHLIGHTS

01	34 luxury villas and one palace within a gated compound
02	Private palace with high-end architectural detailing
03	Architectural, structural and MEP works across all buildings
04	High-quality interior finishing and bespoke luxury fit-out
05	Full site infrastructure, including utilities and service networks
06	Landscaping and external works across the compound
07	Security, access control and privacy systems
08	Premium materials and finishes coordinated across all units

Mosque Architecture & Construction

OVERALL AREA	BUILT-UP AREA	CLIENT
23,000 m²	Over 7,000 m²	Sheikh Saleh Al Ghamdi

OVERVIEW

Design and construction of two mosques for the same client: Abou Adllah Mosque, completed in 2014 with a project value over 7 million, and Saleh Al Ghamdi Mosque, completed in 2017 with a project value over 35 million.

KEY HIGHLIGHTS

01	Architectural design reflecting Islamic sacred architecture
02	Complete structural works and reinforced concrete construction
03	MEP systems: HVAC, plumbing, electrical, fire protection and lighting
04	High-quality interior finishes for prayer halls and functional spaces
05	External works and site infrastructure, including courtyards
06	Acoustic, lighting and environmental comfort for worship spaces
07	Full testing, commissioning and turnkey handover of both mosques

Dana Bay Peninsula Resort Development

CONTRACT VALUE	CLIENT	DEVELOPMENT AREA
Over SAR 138 Million, 2018	Jenan Real Estate	Over 110,000 m^2

OVERVIEW

Full-cycle design, engineering, procurement and construction of a coastal luxury resort of 82 high-end chalets, including site development, stone-paved access roads, utilities, landscaping and turnkey delivery of a premium resort environment.

KEY HIGHLIGHTS

01	82 luxury chalets with high-end architectural finishes
02	MEP works: HVAC, plumbing, fire protection, power, low-current and GRMS
03	Site-wide infrastructure and utilities networks
04	Landscaping, including softscape and hardscape works
05	Internal stone-paved roads and resort circulation network
06	Execution aligned with premium coastal hospitality standards
07	Full testing, commissioning, and turnkey handover of the resort

Project Hoardings

Project Hoardings & Site Fencing

PORTFOLIO

A complete range of site hoarding solutions for construction and mega projects, including:

PRODUCT RANGE

01

Timber Hoardings: Plywood and timber-frame site enclosures, painted and branded to project specifications.

02

Banner & Mesh Hoardings: Large-format PVC and mesh banners printed and tensioned on site fencing.

03

Steel Hoardings: Corrugated and flat-sheet steel panels on galvanized frames for long-term sites.

04

Concrete Barriers: Precast jersey barriers and concrete bases for perimeter security and traffic control.

05

Installation & Maintenance: Site survey, installation, and graphic replacement through the project life.

Project Hoardings Portfolio

OVERVIEW

Hoardings designed, printed, fabricated and installed for real estate developers and investment funds, from illuminated steel-frame walls to timber and banner enclosures.

PROJECTS DELIVERED

01

Jood: full printed wrap of the sales centre and site walls, with Arabic brand graphics and contact details.

02

Hayat Walk: long illuminated hoarding carrying developer and partner branding with project renders.

03

Nesaj Town: lit billboard hoarding with lifestyle imagery, QR code and sales hotline.

04

Ayala: printed hoarding panels with project renders and brand messages.

05

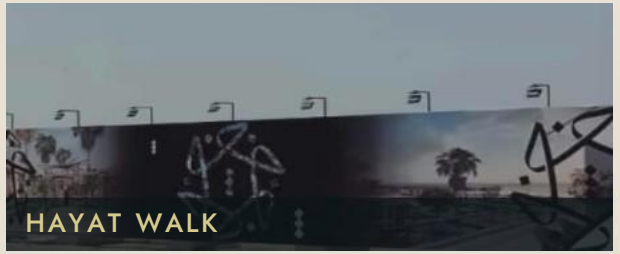

Ayala signage: raised 3D logo letters fixed to the project wall.

06

Home-build hoarding: green hoarding with a QR code that lets buyers follow construction progress.

SCOPE OF WORK

01	Architectural concept and design development, from site study to construction drawings.
02	BIM modeling and clash coordination across structural and MEP disciplines.
03	Interior and exterior design: space planning, facades, finishes, furniture, and landscape.

One model, from design to construction

OVERVIEW

Every project runs through an eight-stage BIM workflow in a single shared model, so design, cost and site teams work from the same data.

WORKFLOW STAGES

01 Concept design: massing, space planning

02 3D BIM: architecture, structure, MEP

03 Coordination: clash detection

04 Analysis: energy, structure

05 4D BIM: timeline simulation

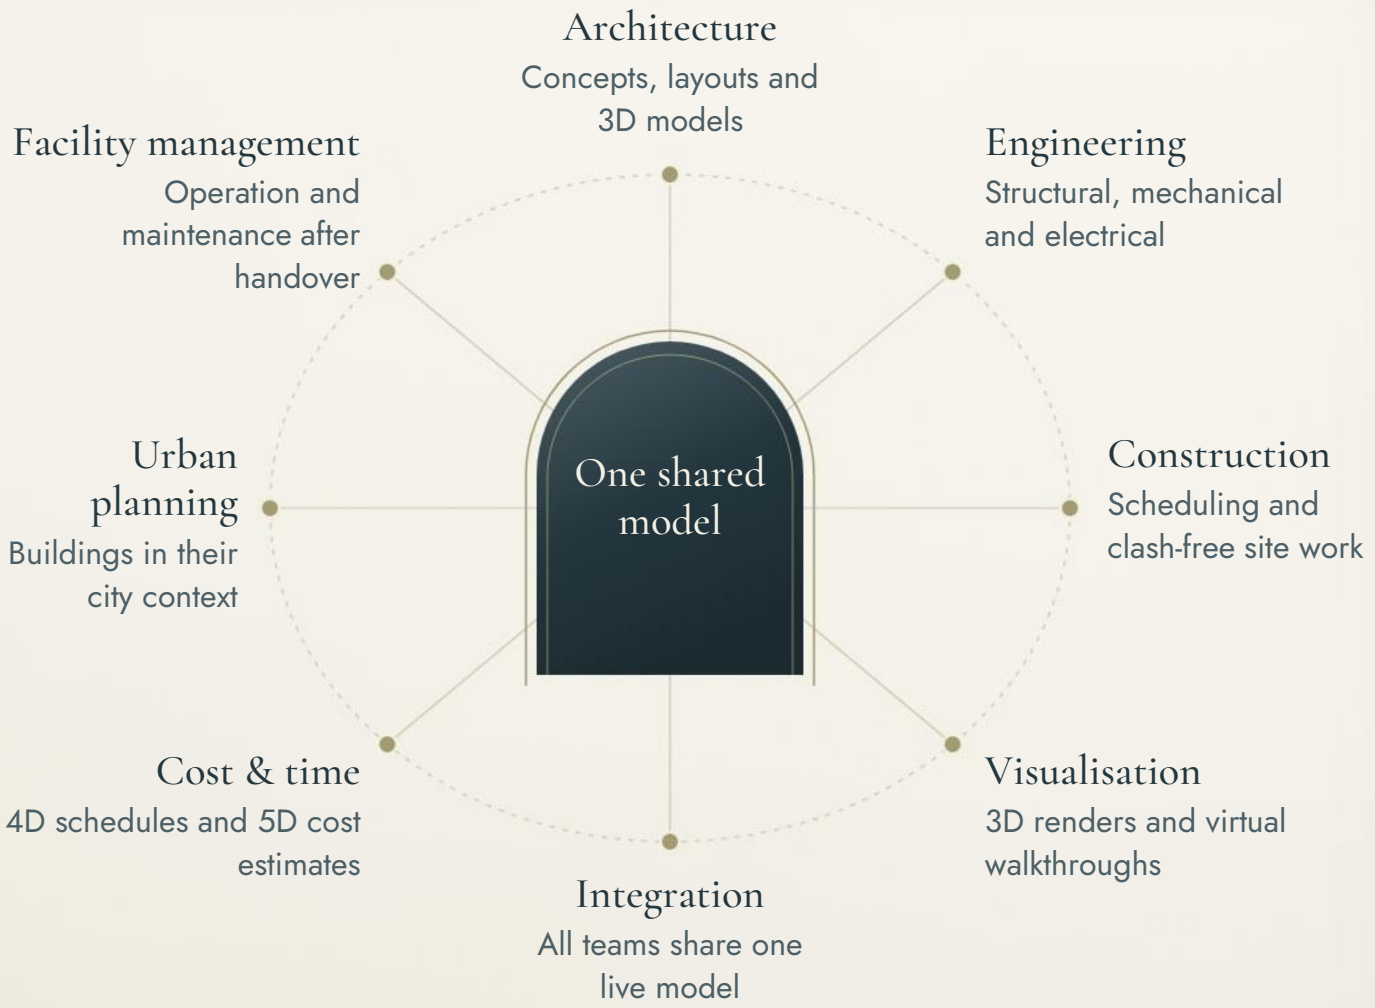

06 5D BIM: take-off and cost

07 Documentation: drawings, BOQs

08 Construction: site coordination

One model connects every discipline

Building Information Modelling links eight disciplines in one shared digital model, from first concept to daily operation.

RESULT

Fewer clashes on site, accurate costs and schedules, and a full digital record of the building.

Value proposition & synergies

Three principles shape how Golden Gate International delivers for clients across the Kingdom, from the first design concept to final handover.

01

Specialized Expertise Across Every Discipline

Each sector is led by an established market specialist, eliminating execution risks and ensuring top-tier deliverables.

02

Global Design Meets Local Execution

European design standards from France integrated seamlessly with local manufacturing and contracting capabilities in Saudi Arabia.

03

Single-Source Accountability

Streamlined management across design, manufacturing, construction, and marketing for clients across the Kingdom.

Integrated delivery

Design, fabrication, construction, and marketing are managed as one continuous process, from the first concept through final handover and launch.

STAGE 01

Design

ENGINEERING & BIM DESIGN · FRANCE

Architectural concept, engineering, BIM modeling from LOD 300 to LOD 500, and interior-exterior design.

STAGE 02

Manufacture

SIGNAGE & PRINT FABRICATION · SAUDI ARABIA

In-house fabrication of signage, hoardings, displays, and large-format print, with quality checks before installation.

STAGE 03

Build

CONSTRUCTION & MEGA PROJECTS · SAUDI ARABIA

Site coordination, civil & MEP supervision, subcontractor oversight, and schedule, budget, and compliance management through final handover.

STAGE 04

Launch

ADVERTISING & MEDIA · SAUDI ARABIA

Marketing strategy, wayfinding, branded uniforms and linens, LED displays, and full brand rollouts.

Quality & standards

Every discipline works to recognized international benchmarks and Saudi regulatory requirements, from the first design model to final site handover.

01 International & local codes

Construction delivered in strict adherence to international engineering and local regulatory standards.

02 Aramco & Royal Commission

Building and infrastructure projects delivered for Saudi Aramco to its engineering, safety, and quality standards.

03 Advanced coordination

Building Information Modeling from LOD 300 to LOD 500 for precise, seamless engineering alignment.

04 Quality control on site

Civil & MEP supervision, subcontractor oversight, and quality control across every project.

05 In-house quality assurance

Shop drawings, material samples, and quality checks prepared in-house before every installation.

06 Compliance to handover

Schedule, budget, and compliance management from breaking ground through final handover.
